Hungarian Distributor announced

Robe Show Lighting wrapped up a deal at Prolight & Sound Frankfurt 2004 with Budapest-based Art Light & Sound, which becomes their Hungarian distributor.

Robe Show Lighting wrapped up a deal at Prolight & Sound Frankfurt 2004 with Budapest-based Art Light & Sound, which becomes their Hungarian distributor.

Harry von den Stemmen explains that Robe had waited patiently to find exactly the right distributor for the territory, and extremely happy when approached by Art Light's Beatrix Tóth and Zsolt Burai. *"This company really has what it takes to make Robe a success in Hungary, just as it has been like in so many other countries"* states von den Stemmen, adding *"I'm sure we'll soon see a dramatic heightening of Robe's presence in this important central European territory."*

Art Light & Sound was founded in 1998 by its two owners Beatrix Tóth (sales) and Zsolt Burai (technical support). Both had many previous years industry experience working with other lighting companies. Since its inception, Art Light & Sound has established a strong market position by selling the best quality products and maintaining a commitment to continuous and ongoing improvement to service. Art Light supplies equipment to a whole variety of lighting and sound installations, live shows and other projects, and also offers design and consultancy services, plus full technical and installation support.

The company engages in a constant dialogue with many international companies, and is dedicated to supplying the very best advice and support for its costumers. Recognizing the special needs of lighting and sound as a hybrid profession - combining both technology and art - Art Light always seeks to find clients the best and most cost-effective solutions.

Turnover has consistently increased over the years, a trend they know will continue with the excellent Robe brand now onboard.
