Robe ColorWash 1200E AT launch

Robe Show Lighting's new ColorWash 1200E AT is now in full production.

Robe Show Lighting's new ColorWash 1200E AT is now in full production. The fixture has been an eagerly awaited addition to Robe's moving head range, and capitalizes on the huge popularity of the high-power ColorSpot 1200 AT/ColorSpot 1200E AT fixtures.

The potent ColorWash 1200E AT comes complete with a CMY color mixing system; variable CTO; 2 colour wheels - each with 6 easily replaceable slots for colors and effects; a combined dimmer/shutter and many more features. The ColorWash 1200E AT zoom has a range of 10 - 87° depending on the lens type used.

The electronic ballast enables features like flicker-free operation, extended lamp life and power-saving mode. The large LCD display - highly successful on Robe's ColorSpot 1200 AT profile fixture, makes the operation of the ColorWash 1200E AT quick and easy. An Ethernet connection offers additional connectability.

The low noise advantages make the fixture ideal for all types of studio application. ColorWash 1200E AT is also an ideal tool for large theatres, live productions and television shows, and for all types of installations from multi-purpose venues to large clubs.
